Follow the Hanson Lake Road...

A guide to accessible
accommodations and campgrounds
from Creighton to Smeaton

Saskatchewan's Hanson Lake Road is the direct route to summer fun and adventure for the entire family.

The paved highway, which spans much of the northeastern section of the province, provides easy access to many of Saskatchewan's best destinations for fishing, canoeing, hiking, wildlife viewing, historic sites and cultural activities.

The highway was constructed in the 1950s and 1960s, and named in honour of Olaf Hanson, a legendary prospector and trapper in the region. Km 0 of the Hanson Lake highway begins at the friendly community of Smeaton.

Narrow Hills Provincial Park provides an excellent opportunity to explore the unique geography of the area. The 335-square mile natural environment park is known for its lakes, forests and esker hills formed by glaciers.

Blueberry picking is very popular here. Previous forest fires in the area have created a favourable habitat for the wild berries.

Close by are the Gem Lakes, a cluster of deep sand-bottomed lakes reflecting vivid shades of emerald, jade and aqua blue. Three wilderness campgrounds are available at Jade, Diamond and Opal Lakes. Scenic driving tours are a great way to explore the Gem Lakes.

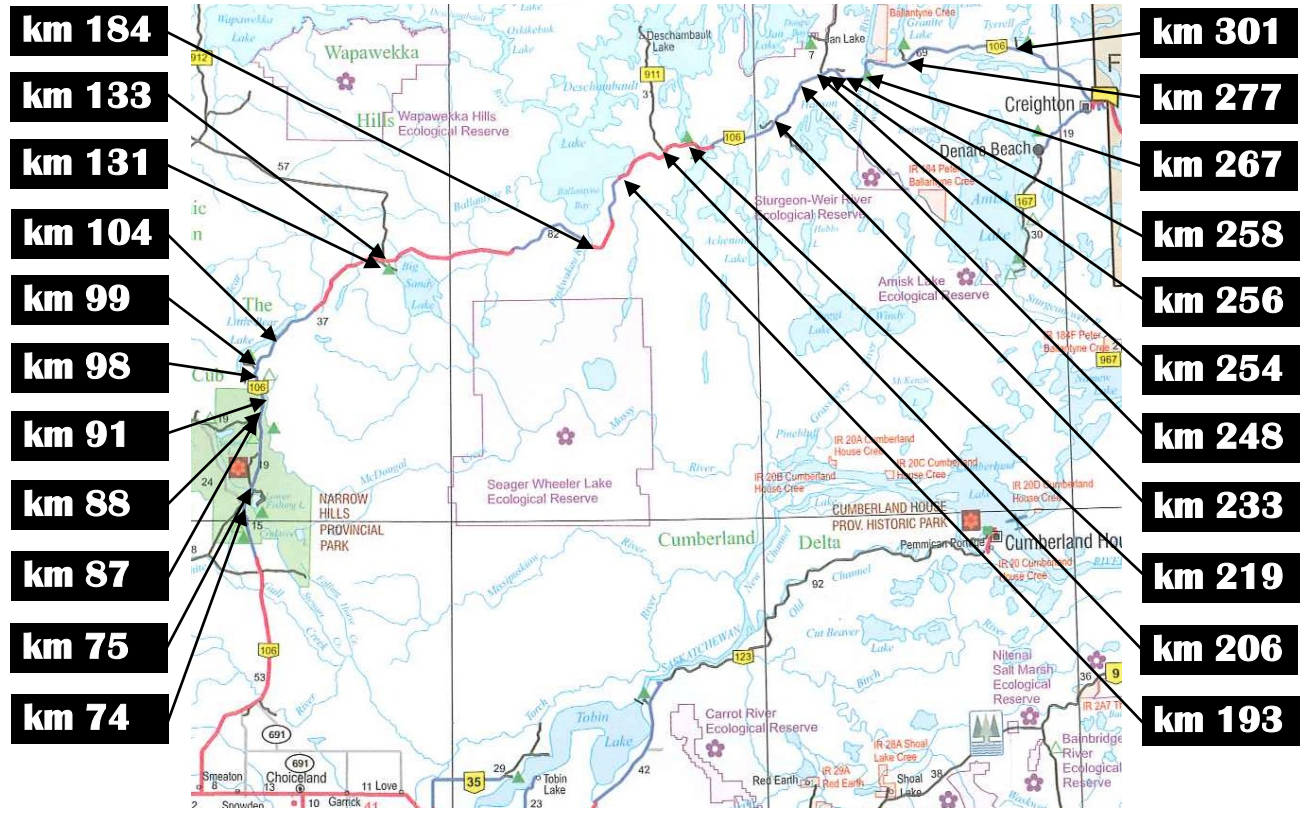

Turning off onto Highway 165 will take you to one of Saskatchewan's premier wild mushroom harvesting grounds. During the mushroom season, a small community of harvesters covers the area, picking the mushrooms and selling them to mobile buyers.

Highway 135 provides access to Island Falls, the oldest operating hydroelectric dam in Saskatchewan, completed in 1929.
